Open Project : Presentation

Summary:

Contents

Chapter I

Foreword

Vincent: And you know what they call a... a... a Quarter Pounder with Cheese in Paris?
Jules: They don't call it a Quarter Pounder with cheese?
Vincent: No man, they got the metric system. They wouldn't know what the fuck a Quarter Pounder is.
Jules: Then what do they call it?
Vincent: They call it a Royale with cheese.
Jules: A Royale with cheese. What do they call a Big Mac?
Vincent: Well, a Big Mac's a Big Mac, but they call it le Big-Mac.
Jules: Le Big-Mac. Ha ha ha ha. What do they call a Whopper?
Vincent: I dunno, I didn't go into Burger King.

Chapter II

Open project

What is an open project?
It's a project for which you will choose the topic you want to work on. Your goal is to create a group to work on a subject you all want to work on, within a given timeframe. It's also the time to do something that matters for you. Your open project is split in 2 steps:

- The first step is the project choice. By following the rules given on the subject, you must choose the specifications of your project. This is peer-validated, so write up something clear for the other students. You must write an exhaustive list of everything your project require, that will be checked once you've finished the project.

- Your items must respect the timeframe given. It must represent 7 months of work.

- Open project is not a full-time project. We recommend you invest 2 to 3 days per week, and split the work according to how many students are in the group

- Once the first project validated, you have access to the second subproject and its repository. You have, starting here, 7 months to complete the project.
